Professional Experience

SOGsolutions(Sole-Proprietorship) **Full Stack Developer(Freelance)**

06/24 - present

Full Stack Developer with a right-on-time record of delivering successful web solutions as a freelancer under the name SOGsolutions.

- Built and deployed 3 high-quality websites for clients, leveraging expertise in Python(Django), JavaScript(Svelte), Computer Vision(OpenCV), which were committed to crafting digital experiences that drove my clients success.

YouTube **YouTube(VIDEO-MAKER)**

11/24 - present

YouTube Video Creator | Video Editing Expert.

- With expertise in video-editing software like InShot and visual effects tools like TweenCraft, I've produced 10+ high quality YouTube videos. Additionally, I've leveraged OBS Studio for video-making and real time content creation.

Projects

Boat - SaaS/Learning - Advertising

- Boat is a user friendly web/mobile learning and advertising platform which is under development, it is specifically developed to offer solutions to the problems which students encounter when reading. And inclusively to enable small business owners advertise their products for a little price.

Data Encryption Tool

- The DET was initially developed as a clients final-year project, but evolved into a technology which could help in safe-guarding of user data in a more secure and easier way.
- Using tools like Django and encryption libraries, the DET can help encrypt your data and store it via a key for later use.
